WHY CHOOSE US

Fire Sentry Systems is a full-service fire protection company. We are licensed, bonded and insured.

We take pride in the quality of our customer service and the responsiveness to customer needs.

We perform every inspection, testing, maintenance, installation or repair job with integrity above all else.

Our customer's satisfaction is our top priority.

We want to be your partner for your business fire safety needs.

WHO WE USE

Since 1997 Fire Sentry Systems technicians have gained a reputation for outstanding excellence in the installation of fire and life safety equipment. Fire Sentry sells and installs the highest quality equipment from Honeywell, including Gamewell FCI, Farenhyt, Silent Knight Fire-Lite and Xtralis. We're also experts in EST, Harrington, Potter, Notifier, Bosch and others. Let Fire Sentry's team of experts design a system that is user friendly, reliable and above all, safe.

WHAT WE DO

Testing

With nearly 2 decades of experience inspecting systems to NFPA 72, Joint Commission, and many other authority standards, we effortlessly meet any client's needs. Fire Sentry uses time tested methods that increase efficiency and reduce disruption while the inspection is being performed. We provide all necessary documentation for record keeping needed after an inspection is complete, making the process cost effective, simple and stress-free for building owners and property managers. If any deficiencies are found, we will provide cost efficient solutions to get the system restored to optimal working condition, ensuring that your building is always up-to-date, compliant, and safe.

Monitoring

Fire Sentry Systems offers best-in-class UL Listed monitoring services. Our monitoring center is located in the Northwest and uses live agents, not robots (yes that's a thing), to ensure the best customer service available. We offer site and facility management through mobile and web apps to streamline getting the information you need regarding the status of your systems. Fire Sentry offers numerous options to monitor various system types utilizing telephone lines, internet protocol (IP), or via cellular transmission.

Extinguishers

With Fire Sentry Systems, know that you can rely on your fire extinguishers when it counts. Our NAFED certified extinguisher technicians can inspect, certify and recharge most common portable extinguishers. Our partnerships with major manufacturers ensure you the best pricing for specialty applications and new installations.

Service

Because of Fire Sentry Systems' extensive experience with a number of systems and manufacturers, we have gained the reputation of being a one-stop shop for all life safety, security and other low voltage systems. We offer full service contracts that can be tailored to fit any size business and budget that aid in keeping systems operating properly while ensuring costs remain in check. We support fire alarms manufactured by, but not limited to, Simplex, Notifier, Farenhyt (Silent Knight IFP), Gamewell FCI, Firelite, Edwards Quickstart, EST 2, EST 3 and many others.
